## Optimization a Powerful Force on RBJ's List of Electrical Contractors

Optimization Technology, Inc. made Rochester Business Journal's list of Electrical Contractors for the fourth straight year. Optimization ranked 8th out of 15 local companies, with 47 local electricians and one of the highest local revenues.

Optimization's journeymen electricians and instrument mechanics work on hundreds of industrial projects each year, specializing in low and medium voltage projects such as control panels and I/O, underground power distribution and facility electricity. Optimization also has a high voltage team, focusing on high voltage cable and transformer installations, lead splicing and arc flash studies.

In 2008, Optimization began an apprenticeship program, giving young electricians a chance to learn alongside Optimization's own seasoned professionals and providing the right foundation for Optimization to remain on RBJ's list of Electrical Contractors for many years to come.

*[Optimization Technology, Inc.](http://www.optimization.us), a global design, engineering and fabrication company headquartered in Rochester, New York, provides industrial and manufacturing applications from concept to completion. Optimization has several locations in the U.S., including corporate headquarters in Rush, NY, development and fabrication facilities in Rochester, and other engineering offices in Houston, Syracuse, Boston, Philadelphia, Denver and Minneapolis.*
