Optimization's New Office in Dallas to Serve Oil and Gas Industry

DALLAS, TX – Optimization announced today the opening of its new office located in Dallas, TX. This latest location makes Optimization more accessible to its [oil and gas industry](#) clients, and will provide software and controls engineering solutions as well as turnkey [test systems](#).

“Dallas has deep roots in the oil and gas industry, and a growing presence in the medical, aerospace and semiconductor sectors,” said David Weng, general manager of Optimization’s Dallas office. “As safety, quality and testing requirements become more stringent, Dallas area companies will need a solution provider close at hand for help with test systems, data acquisition, monitoring and controls. Our Houston clients count on us to provide system integration services, from concept to completion. We aim to provide these same valuable services to new clients in Dallas.”

Optimization’s Dallas office complements its existing Houston office, which provides [software](#) and [controls](#) engineering, as well as certified [National Instruments training](#) services.

##

[Optimization Technology, Inc.](#), a global design, engineering and fabrication company headquartered in Rochester, New York, provides industrial and manufacturing applications from concept to completion. Optimization has several locations in the U.S., including corporate headquarters in Rush, NY, development and fabrication facilities in Rochester, and other engineering offices in Boston, Denver, Houston, Minneapolis, Philadelphia, Syracuse, and a new office in Dallas.
