TSD Joins the Optimization Family of Companies

ROCHESTER, NY – On January 19, 2009 Total Systems Design, Inc. officially merged with Optimization Technology, Inc. Being a part of the Optimization team will bring TSD customers a broad array of additional services. This includes engineering and design of process and mechanical systems, controls and system integration, fabrication and installation, and construction and maintenance services for industrial applications. TSD's experience in automation, validation and MES will complement and expand Optimization's established automation capabilities.

Total Systems Design, Inc. will now be TSD an Optimization Company. Together, TSD and Optimization can satisfy the demands of major global manufacturing firms who want to reduce their costs and risks by working with a full service preferred supplier. TSD will strategically add support based in the Greater Philadelphia area.

The merger has already borne fruit. Several multi-discipline proposals have been developed that will leverage the established strengths of both TSD and Optimization Technology, Inc.

Optimization Technology, Inc., a global design, engineering and construction company headquartered in Rochester, New York, provides solutions and services for industrial and manufacturing applications. Optimization has several locations in the U.S., including Rochester, Houston, Syracuse, Boston and Philadelphia, as well as Canadian operations based in Alberta.
